this book is the preliminary part of a great work titled the book of the egyptian the beginning of the basic egyptology or a key to the understanding of history philosophy and world religion usually the introduction is made in the form of a brief preface or foreword but i got a whole book as the first step in a multi volume publication of the study the purpose of this specific introduction as the beginning of serious research is right at the level of the opening to inspire a reader showing

him in a clear visual and comprehensible form the whole true mechanism of the hieroglyphic writing to achieve this i will completely dispel the myth created by the modern science that hieroglyphs do not convey any meaning of words the whole idea but only individual sounds letters or their combination syllables this scientific myth will be finally deprived of the status of scientific knowledge and the translation of the phaistos disc on the contrary will be clearly shown what is called broken apart and will be read in the ancient hieroglyphic language united by the principle of construction in the language of the ancient egyptians i can say that it will not be two simultaneously existing systems of hieroglyphs translation as well as two egyptologies one will be false and the other true to prove the validity of the system of translation i wanted to give you immediately not only a complete translation of the text of the phaistos disc where the number of occurrences of each hieroglyph is not big 1 to 19 times but the translation of the whole ancient egyptian writing because the number of times it is used in there is thousands if not even millions and each such use of each hieroglyph is translating in the same way so it creates the full reading of the hieroglyphic texts writing which will be easily read by everyone with the dictionary of hieroglyphs in the future the main reason why i wanted to do it is because at first i read the ancient egyptian texts and only then by chance came across with the hieroglyphs of the phaistos disc but then i decided to set a different aim to teach the reader to think and not just to read hieroglyphs since we have no ancient egyptian temple and you re not its novice the method of achieving the aims will be different than in the antiquity first of all i would suggest not a translation of ancient egyptian hieroglyphs but a complete translation of the phaistos disc and at the same time to give them a sort of test of common sense to modern science in the face of particular academies and universities of the world let them answer me the question not knowing the translations of ancient egyptian texts whether they think this translation of the phaistos disc is correct so when i completely publish the book of egyptian it will become clear who they are and where do they lead all of you as they always test the students it s a time to test them as well will they pass the test i do not know but any way you my reader will get to know about it in the main manuscript and will be able to draw your own conclusions about their intellectual level therefore i recommend you to take this message of the book at least with the attention because not every day the science gets a ready revelation designed in the form of scientific study and here the attention and common sense will help the reader to re look the original pure uncomplicated meaning of the hieroglyphs which through the veil of delusion will finally begin to appear in their true original and vibrant colors and finally get from the nether world into the realm of the living

the hieroglyphenkunde by karl giehl published in 1915 described variously by critics as a masterpiece magnificent monumental and incomparable is here translated into english for the first time giehl s work with an initial focus on the hieroglyphica of horapollo the manuscript of which was discovered by giehl was a pioneering attempt to introduce the thesis that egyptian hieroglyphics had a fundamental influence on the italian literature of allegory and symbolism and beyond that

on the evolution of all renaissance art the present edition includes the illustrations of albrecht dürer from the pirckheimer translation of the horapollo from the early fifteenth century

throughout the pharaonic period hieroglyphs served both practical and aesthetic purposes carved on stelae statues and temple walls hieroglyphic inscriptions were one of the most prominent and distinctive features of ancient egyptian visual culture for both the literate minority of egyptians and the vast illiterate majority of the population hieroglyphs possessed a potent symbolic value that went beyond their capacity to render language visible for nearly three thousand years the hieroglyphic script remained closely bound to indigenous notions of religious and cultural identity by the late antique period literacy in hieroglyphs had been almost entirely lost however the monumental temples and tombs that marked the egyptian landscape together with the hieroglyphic inscriptions that adorned them still stood as inescapable reminders that christianity was a relatively new arrival to the ancient land of the pharaohs in egyptian hieroglyphs in the late antique imagination jennifer westerfeld argues that depictions of hieroglyphic inscriptions in late antique christian texts reflect the authors attitudes toward egypt s pharaonic past whether hieroglyphs were condemned as idolatrous images or valued as a source of mystical knowledge control over the representation and interpretation of hieroglyphic texts constituted an important source of christian authority westerfeld examines the ways in which hieroglyphs are deployed in the works of eusebius and augustine to debate biblical chronology in greek roman and patristic sources to claim that hieroglyphs encoded the mysteries of the egyptian priesthood and in a polemical sermon by the fifth century monastic leader shenoute of atripe to argue that hieroglyphs should be destroyed lest they promote a return to idolatry she argues that in the absence of any genuine understanding of hieroglyphic writing late antique christian authors were able to take this powerful symbol of egyptian identity and manipulate it to serve their particular theological and ideological ends

this introductory guide for beginners provides an introduction to the decipherment of ancient egyptian hieroglyphic writing and arithmetic with a little light hearted humour all the hieroglyphs portrayed within this book over 780 are provided free of charge as keyboard characters they allow the reader to create their own messages names numbers and designs which can be easily printed these hieroglyphs are compatible with all software packages that run on both windows based and macintosh computers this step by step guide introduces the reader to the peculiar style of arithmetic and units of measure employed by the ancient egyptians from counting loaves and recording the strength of beer to the volume of stone in a pyramid and the recording time

written reputedly by an egyptian magus horapollo niliacus in the fourth century c e the hieroglyphics of horapollo is an anthology of nearly two hundred hieroglyphics

or allegorical emblems said to have been used by the pharaonic scribes in describing natural and moral aspects of the world translated into greek in 1505 it informed much of western iconography from the sixteenth through the nineteenth centuries this work not only tells how various types of natural phenomena emotions virtues philosophical concepts and human character types were symbolized but also explains why for example the universe is represented by a serpent swallowing its tail filial affection by a stork education by the heavens dropping dew and a horoscopist by a person eating an hourglass in his introduction boas explores the influence of the hieroglyphics and the causes behind the rebirth of interest in symbolism in the sixteenth century the illustrations to this edition were drawn by albrecht dürer on the verso pages of his copy of a latin translation

this book is written for high school students and beginners it avoids using complicated grammar the examples are kept simple in many cases the hieroglyphs are unrolled each hieroglyphic word is presented to the student one hieroglyph at a time just as we write an english word one letter at a time each hieroglyph is treated as if it were a letter this makes it much easier for the beginning student volume 1 consists of a series of simple lessons which when completed will enable the student to read many simple hieroglyphic sentences and significant parts of more complex sentences the grammar presented is middle egyptian which is the most common version taught it is not necessary to have previously studied any other foreign language in many ways learning ancient egyptian will be easier for the student who has never studied a foreign language before

an a z reference providing concise and accessible information on ancient egypt from its predynastic cultures to the suicide of cleopatra and mark anthony in the face of the roman conquest annotation bunson an author of reference works has revised her 1991 reference which is appropriate for high school and public libraries to span egypt s history from the predynastic period to the roman conquest the encyclopedia includes entries for people sites events and concepts as well as featuring lengthy entries or inset boxes on major topics such as deities animals and the military a plan and photograph are included for each of the major architectural sites

the full range of the history and archaeology of ancient egypt is presented in this lavishly illustrated book also available in french german italian and spanish

clear easy to follow text tells absolute beginners how to transcribe hieroglyphs by presenting and explaining 134 phonetic elements includes section on word analysis newly enlarged pronunciation guide and much more

the decipherment of ancient maya writing is an important story of intellectual discovery and a tale of code breaking comparable to the interpreting of egyptian
